

## ***PRACTICAL SAILOR ONLINE***

If you find this month's article on boat design (see page 8) interesting, then you'll want to also read two stories now online that recap our 2005 Conference on Yacht Design. During that conference, prominent U.S. designers Robert Perry, Tim Jackett (Tartan and C&C), Glen Henderson (Hunter Marine), Tony Smith (Performance Cruising), and Jim Taylor (Sabre) shared their views on the ideal cruising boat. Those stories, as well as the final results of our last hull wax test and a buyers' guide to sextants, are now in the "Tools and Techniques" section of *[www.practical-sailor.com](http://www.practical-sailor.com)*.
