

Bamar in Canada

Ocean Sailing Enterprises, www.oceansailing.ca, is the new Canadian distributor for Bamar. The company is very impressed with your March

article on spinnaker furlers. It is a sign of the times, and we believe they will become standard spinnaker-handling equipment. We hope that in any future reference to the Bamar product, you can list us as the Canadian distributor as your publication has many Canadian readers.

Paul Hrabowsky
Ocean Sailing Enterprises
Vancouver, B.C.

The Bamar Roll-Gen will be used for future tests of asymmetrical spinnakers.

The Bamar Roll-Gen and other select devices from our furling test will go into use this summer as we continue our evaluation of light-air sails and equipment.
